Subject: Dimock -- just out of curiosity

In the first tranche of results, there were some very high hits of methane. (If memory serves, HW12 had 52 ppm, or thereabouts.)

Do you have the baseline (pre-drilling) methane data for these wells? Would you happen to know if the high levels are at houses where Cabot is allegedly required to install methane mitigation?

Please let me know your thoughts.

Thanks in advance.

- b
